

The Agile Assessment – Fast-tracking your Adoption of Agile

Enterprises that recognize the need to make their development teams more agile often face entrenched cultural and environmental obstacles to making it a reality. CollabNet’s Agile Assessment is a critical step in the process. The assessment is a formal, structured approach that follows a tested methodology proven effective in numerous customer engagements. It leverages the years of experience our consultants bring to bear on Agile projects.

Key Benefits

- **Improves Visibility And Understanding:** Through on-site interviews and observation, your management team will gain unprecedented insight into both the strengths and weaknesses of your development organization.
- **Accelerates Agile Adoption:** A key deliverable of CollabNet’s Agile Assessment is a detailed and measurable action plan. The action plan takes into account your specific goals and drivers, and addresses those areas in your development organization that need to be addressed in order to achieve those goals.
- **Enhances Team Collaboration:** CollabNet’s Agile Assessment is specifically geared to build a cross functional view of your development organization. This helps ensure that the perspectives of all stakeholders are addressed and that collaboration is maximized.

Assessment Deliverables

CollabNet’s Agile Assessment follows a tested methodology that has been proven effective in numerous customer engagements. The result is an assessment that provides a clear definition of the goals you are seeking to accomplish while weighing the business context in which you operate. It delivers a snapshot of your organization, helping you to determine the extent that you have embraced Agile. Finally, it delivers a crisp, prioritized plan that defines the practical steps you should take to become more Agile.
