

CollabNet Labs

Private Community Project for TeamForge Customers

The CollabNet ALM Platform – Your Integration Foundation

Through our trusted partners, community members, CollabNet Engineers and our own integrated, extensible TeamForge Connect platform, we are able to offer supported integrations to your favorite lifecycle tools to optimize any or all phases of Enterprise Cloud Development.

In keeping with our open-source and community heritage, many of these integrations are offered free and are backed up with commercial support. CollabNet provides the infrastructure, the framework and the technical resources to help you run a secure, integrated development community in your cloud or our cloud.

Powerful & Pragmatic Tools Created By Our Services Team

Inspired by CollabNet's work with customers, CollabNet Labs enables our TeamForge customers to gain access to practical integration and customization tools created by our Professional Services staff. Labs integrations are formally tested to meet the Quality Assurance service levels of our own CloudForge hosting platform and to confirm compatibility to new TeamForge releases.

Only CollabNet verified customers have free access to CollabNet Labs projects that include code integrations, snippets, documentation, forums, update alerts and more. CollabNet provides ongoing updates with alerts, TeamForge version support and operational QA. Sometimes these tools are so widely adopted they become TeamForge features.

Subscribe to the exclusive CollabNet Labs Services

Purchase a CollabNet Labs Subscription Service to gain access to our Professional Services team, commercial support for the CollabNet Labs integrations, plus access to an even greater pool of restricted tools.

- Developed by the CollabNet Services Professionals
- Practical solutions inspired by our work with customers
- Access to Lab Projects only open to CollabNet customers
- Governed by each integration's End User License
- Community or Commercial Support available
- Services for these integrations available upon request
- Paid Subscription provides deeper access to controlled tools and staff

Annual paid subscription provides you with privileged access to the most powerful tools that may require some expert guidance. You will have access to confidential forums on these specific, integrated tools and monthly phone consultations with one of our Service Professionals.

There are sophisticated service tools for migrations to and from non-TeamForge sites or to set up and streamline Web Single-Sign-On (SSO). Or a data scrubber script to connect to the CollabNet TeamForge database. Support and Services for these tools are available from the CollabNet Professional Services team who can guide you through implementation, migration, adoption and management of TeamForge.

Get Started

Visit CollabNet Labs and join the exclusive project for our customers and partners.

Reserved For Subscribers:

- Access to higher-value services outside of support coverage
- Access to powerful migration tools
- Access to more sophisticated service tools
- Ongoing tool updates with alerts to users
- TeamForge version support

Specialized Tools For:

- Migration
- Administration
- Developer Productivity
- Operations

Hybrid development and deployment

Enterprises are now implementing Enterprise Cloud Development with the CollabNet platform that helps manage the shift to a hybrid development strategy.

As a result, they are achieving productivity gains of up to 70 percent while reducing costs by as much as 80 percent, all with enterprise compliance in order.

Administration

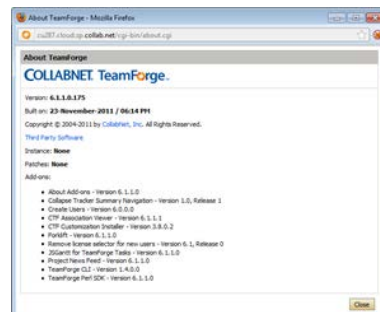

Create Users

- TeamForge Add-on
- Mass user creation script
- Create users on any TeamForge host that can be reached from Linux server or workstation.

```
[root@cu207 create_users]# ./createUsers sample.csv
User: freddy,freddy@collab.net,Fred D. Why,,en,GMT,ALM,FALSE,FALSE,Ch@ngeMe12
user1174
User: bob,bob@local.lan,bob d manager,,en,GMT,ALM,FALSE,FALSE,Ch@ngeMe12
user1175
User: alice,alice@local.lan,alice d admin,,en,GMT,ALM,TRUE,FALSE,Ch@ngeMe12
user1176
```

About Add-ons

- TeamForge Add-on
- Extend Help window
- List additional packages installed with this generic customization installer

Developer Productivity

TeamForge Perl SDK

- Official TeamForge SDK for Perl Developers
- Easily develop scripts and tools to interact with a TeamForge server
- Leverage samples and user manual

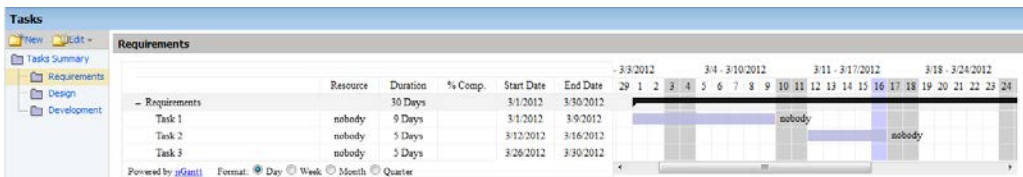

Collapse Tracker Navigation

- TeamForge Add-on
- Allow users to collapse left side navigation box
- Enable more screen real estate in artifact list view

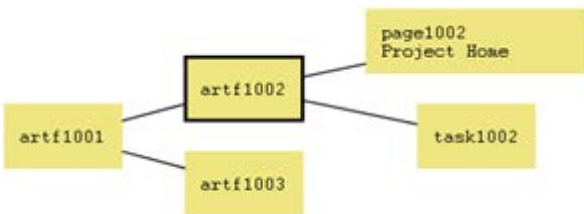

JSGantt for Tasks

- TeamForge Add-on
- Implement JSGantt tool for Task management

Association Viewer

- TeamForge Association Visualizer Add-on
- Add a 'visualize' button to all association tabs

Implementing Enterprise Cloud Development with CollabNet

As the pioneering leader in ALM solutions, CollabNet offers you a proven, powerful and scalable platform that lets you gain the greatest results in distributed software development. With a reliable, high-performance environment to drive your success, CollabNet's integrated products meet your toughest development demands without fail.

Learn more at <http://www.collab.net/products>.

About CollabNet

CollabNet is a leading provider of Enterprise Cloud Development and Agile ALM products and services for software-driven organizations. With more than 10,000 global customers, the company provides a suite of platforms and services to address three major trends disrupting the software industry: Agile, DevOps and hybrid cloud development. Its CloudForge® development-Platform-as-a-Service (dPaaS) enables cloud development through a flexible platform that is team friendly, enterprise ready and integrated to support leading third party tools. The CollabNet TeamForge® ALM, ScrumWorks® Pro project management and SubversionEdge source code management platforms can be deployed separately or together, in the cloud or on-premise. CollabNet complements its technical offerings with industry leading consulting and training services for Agile and cloud development transformations. Many CollabNet customers improve productivity by as much as 70 percent, while reducing costs by 80 percent.
