Subversion Enablement Packages – Basic

Bringing Subversion to the Enterprise

Subversion® has become the open source version control standard for geographically distributed software development organizations. Many enterprises are looking at adopting Subversion to replace their legacy solutions but within the enterprise, corporate governance often mandates that an actual company stands behind an open source product for support and services. CollabNet® is that company for Subversion.

As the founder and primary corporate sponsor of the Subversion project, CollabNet has facilitated its adoption in the enterprise, with technical support, training, consulting, migration services and additional enterprise capabilities. CollabNet

Subversion Enablement Packages are comprehensive bundles of Subversion training, consulting and support services specifically designed for enterprises who want to deploy Subversion rapidly and get the most from their Subversion development teams.

Basic Subversion Enablement Package Components

- Subversion for Developers Web-based Training
- Subversion Live Q&A Sessions
- CollabNet Subversion Silver Support

Business Benefits

- **Accelerate Rollout**: CollabNet's Web-based Subversion for Developers training allows you to quickly train your entire Subversion development staff with CollabNet's industry-leading Subversion training curriculum.
- **Build Expertise**: CollabNet's Live Q&A Sessions give your developers direct access to CollabNet's Subversion subject matter experts who can provide answers to development questions, give advice regarding industry best practices and impart helpful development tips.
- **Receive Ongoing Support**: CollabNet's Subversion Support allows you to leverage CollabNet's unparalleled experience supporting enterprise-class Subversion deployments.
- **Drive Community Involvement**: Because CollabNet is the primary corporate sponsor of Subversion, your enhancement requests are channeled directly to the Subversion community for roadmap consideration.

Basic Subversion Enablement Package Component Descriptions

Subversion for Developers Web-based Training

The Subversion for Developers Web-based training series covers the complete spectrum of using Subversion for software development: from the typical work cycle to branching and merging operations to advanced enterprise features, such as interactive conflict resolution. Each course covers Subversion functionality on a conceptual level and then demonstrates it in practice.

Visit CollabNet

Visit www.collab.net to download CollabNet Subversion and access related tools, support, training resources and in-depth technical content.

Registered members of CollabNet get additional benefits, such as:

- Subversion related extensions such as GUI clients and connectors
- Additional in-depth technical documents
- Participation in technical discussion forums
- Best practices information for communities
- Release and patch notifications
- Sign-up for the Technical Newsletter

Why CollabNet?

- Founder and primary corporate sponsor of the Subversion project
- Employs a team of full-time Subversion committers that drive features and bug fixes
- Hosts the Subversion developer community
- Provides enterprise-class support, training and consulting services
- Offers unparalleled Subversion expertise

About CollabNet

CollabNet is a leading provider of Enterprise Cloud Development and Agile ALM products and services for software-driven organizations. With more than 10,000 global customers, the company provides a suite of platforms and services to address three major trends disrupting the software industry: Agile, DevOps and hybrid cloud development. Its CloudForge® development-Platform-as-a-Service (dPaaS) enables cloud development through a flexible platform that is team friendly, enterprise ready and integrated to support leading third party tools. The CollabNet TeamForge® ALM, ScrumWorks® Pro project management and SubversionEdge source code management platforms can be deployed separately or together, in the cloud or on-premise. CollabNet complements its technical offerings with industry leading consulting and training services for Agile and cloud development transformations. Many CollabNet customers improve productivity by as much as 70 percent, while reducing costs by 80 percent.
