

# CollabNet Subversion Migration Mentoring Workshop (S1625)

The Subversion Migration Mentoring Workshop is focused on preparing an organization to migrate existing version control data into Subversion. The Workshop will cover pre-migration preparation, execute a typical migration (snapshot or full history as determined in the preparation), conduct migration validation, identify any post-migration steps required, and document the entire migration process for subsequent use by customer resources. At the end of the Workshop, customers should have personnel with the required knowledge and documentation needed to continue with migration tasks on their own.

Workshop agenda topics include:

## Day 1 — Training & Pre-Migration Preparation

- Introduce Subversion migration fundamentals, concepts and processes.
- Discuss migration tools and migration methodologies.
- Define a migration plan and identify migration resources and equipment.
- Stage the initial repository and execute any required pre-processing steps and/or structural changes.

## Day 2 — Migration Execution & Documentation

- Perform the migration at a project or repository level.
- Perform a cursory inspection of the migration and validate integrity of the converted data.
- Assist in the drafting of the migration process documentation.
- Define the initial permissions, user roles, and departmental project URL addresses.

## Day 3 — Migration Validation & Post-Migration Steps

- Stage the migrated repositories for any required post-processing steps and/or structural changes.
- Perform end user validation of the migrated projects.
- Validate version control processes with other external integrated processes and applications.
- Assist in the finalization of the migration process documentation (migration guide).

**OpenCollabNet**

Visit openCollabNet to download CollabNet Subversion and to get access to tools, support and training and technical resources.

Registered members have access to:

- Subversion GUI clients and connectors
- Technical forums and best practices communities
- Release and patch notifications
- The openCollabNet Technical Newsletter

## Subversion Resources

Free access to whitepapers, webinar and demo replays, video viewlets, at

[www.collab.net/subversion](http://www.collab.net/subversion)

Hybrid SCM 

Manage Git and Subversion with one common management and security platform.

[www.collab.net/git](http://www.collab.net/git)

## SubversionEdge

CollabNet Subversion Edge provides the fastest and easiest way to deploy and manage Subversion servers, saving time and money.

- Free web and cloud-enabled Subversion platform.
- Fastest and easiest way to deploy and manage Subversion servers.
- Rapid install and live updates of certified stacks.
- Modern web UI simplifies administration and configuration.
- Extensible with REST APIs.
- Free online SVN backup with CollabNet CloudForge.
- Wide variety of enterprise support, training and service offerings.
- Download it free today [www.collab.net/getSVN](http://www.collab.net/getSVN)

**Target Audience:** System Administrators, Configuration Managers and Senior System Engineers (up to 5 total).

**Duration:** 3 days onsite

**Deliverable:** Custom Migration Guide

**Price:** \$10,000\*

\*Travel expenses for onsite portion invoiced separately

## Related CollabNet Services

CollabNet offers additional Subversion services which may be a logical follow on to the Installation and Configuration recommendations.

- Subversion Server Configuration and Administration
- Subversion Applied Workshop
- Subversion Administrator Training

### About CollabNet

CollabNet is a leading provider of Enterprise Cloud Development and Agile ALM products and services for software-driven organizations. With more than 10,000 global customers, the company provides a suite of platforms and services to address three major trends disrupting the software industry: Agile, DevOps and hybrid cloud development. Its CloudForge® development-Platform-as-a-Service (dPaaS) enables cloud development through a flexible platform that is team friendly, enterprise ready and integrated to support leading third party tools. The CollabNet TeamForge® ALM, ScrumWorks® Pro project management and SubversionEdge source code management platforms can be deployed separately or together, in the cloud or on-premise. CollabNet complements its technical offerings with industry leading consulting and training services for Agile and cloud development transformations. Many CollabNet customers improve productivity by as much as 70 percent, while reducing costs by 80 percent.
