Agile Mastery Workshop

Make Your Good Agile Teams Great

Make Your Good Agile Teams Great

AGILE MASTERY WORKSHOP

ACCELERATE YOUR AGILE TRANSFORMATION

Do you have a few good Agile teams and want to supercharge them? How do you clear the obstructions that your teams have encountered? Would you like to make huge progress towards a full Agile transformation for your entire organization?

The CollabNet VersionOne Agile Mastery Workshop is a carefully planned and executed experience to move you from your current competence level to a new level of expertise in an extremely short period of time.

The CollabNet VersionOne Agile Mastery Workshop is an optimized combination of on-site training, go-forward planning, personalized coaching, and on-going follow-up that will elevate the success of your Agile initiative.

The way forward is with a proven leader in Agile – team up with CollabNet VersionOne. CollabNet VersionOne has trained more Scrum professionals than any organization in the world, has coached hundreds of teams from inception to productivity, and has led some of the largest Agile transformations in history. The way forward is with a proven leader in Agile – team up with CollabNet VersionOne. CollabNet VersionOne has trained more Scrum professionals than any organization in the world, has coached hundreds of teams from inception to productivity, and has led some of the largest Agile transformations in history.

TOPICS

The detailed topics that are covered in each workshop are tailored for each customer. Generally, the workshop includes three days on-site and includes additional interaction remotely. Join the workshop and improve your abilities in the following areas.

- Roles – sharpen the understanding of the optimal interaction between team-members, stakeholders and other external groups, and management
- User Stories – refine the way you specify your requirements so you improve customer satisfaction with your final deliverables
- Impediments – learn how to identify and conquer the root cause of obstacles, whether they are individual, team-based or organizational
- Scaling Agile – select the best approaches to drive success across your teams
- Strategic Planning – institute effective techniques for planning within the Agile context and

integrating with other teams that work in more traditional ways

- Hybrid Agile – choose Agile methods appropriately by determining when to use which and how to bring together the best of each. We will consider Scrum, Kanban, XP techniques and Lean
- Management review – intensify management commitment by enhancing their understanding of Agile and communicating effectively their requirements to your Agile teams
- Finally, we will create a summary status of your project and recommend next steps to consolidate and extend your gains in Agile development

BUSINESS BENEFITS

Agile development, when successful, has proven to provide a huge increase to productivity, quality and customer satisfaction. However, it's common for teams to begin the transformation and then encounter roadblocks that can slow and even stop progress. You can use the Agile Mastery Workshop to drive through the issues you are facing and solidify the benefits of Agile development.

- Create model teams that serve as the reference point for other Agile groups as they are developed in your organization
- Identify critical impediments to Agile adoption and create action plans to address them
- Empower management through a clear understanding of the potential of Agile and their critical role in an Agile transformation
- Develop key approaches to scaling Agile throughout the organization
- Build a relationship with a mentor to assist management and practitioners in the Agile journey
- Initiate a custom adoption roadmap for your situation and business goals

TRAINERS AND COACHES

CollabNet VersionOne is the world's leading Agile trainer and coach, having certified more than 14,000 Agile professionals and coached hundreds of organizations, from small teams and companies, to state and federal government agencies, to large multi-national corporations.

Of course, all our instructors are Certified Scrum Trainers, but that's just the beginning. We're also published authors, creators of some of the most popular Scrum material ever developed, and on-going advisors to the world's top Agile companies. We are experts in engineering practices, conflict resolution, organizational dynamics, project planning and management, and large scale transformation.

Because we require that you have a clear level of Agile experience and expertise before we engage with you in an Agile Mastery Workshop, only CollabNet VersionOne's top Agile coaches and trainers provide this service. With CollabNet VersionOne, you can be sure that you have the best of the best to guide you along your Agile transformation
